**CANADIAN EMPIRE EXPLORATION CORP.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2006 AND 2005
(UNAUDITED, PREPARED BY MANAGEMENT)**

1- Nature of operations and going concern

The company is in the business of acquiring, exploring and developing mineral properties and has not yet determined whether its current property contains ore reserves that are economically recoverable. All of the company's mineral property interests are currently located in Canada. The recoverability of the amounts shown for resource assets is dependent upon the existence of economically recoverable reserves, the ability of the company to obtain the necessary financing to complete the exploration and development of its property, and upon future profitable production or proceeds from the disposition of the property.

The company's continuing operations are dependent on its ability to secure additional financing. There can be no assurance that the company will be successful in raising the required financing. As at March 31, 2006, the Company had cash and cash equivalents of \$25,190 and working capital deficit of \$317,597.

The company's ability to continue operating is dependent on management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Because of this uncertainty, there is substantial doubt about the ability of the company to continue as a going concern.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the assumption that the company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation.

2- Significant accounting policies

The accompanying unaudited financial statements have been prepared in accordance with Canadian generally accepted accounting principles on a basis consistent with those outlined in the company's audited financial statements for the year ended December 31, 2005. These notes do not include all of the information and disclosures required by Canadian generally accepted accounting principles for audited financial statements. These interim financial statements should be read in conjunction with the most recent annual financial statements of the company.

3- Capital stock

<u>2,458,000</u>	<u>2,458,000</u>	0.10	September 17, 2009
