NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2006 AND 2005
(UNAUDITED, PREPARED BY MANAGEMENT)**

1- Nature of operations and going concern

The company is in the business of acquiring, exploring and developing mineral properties. The company's continuing operations are dependent on its ability to secure additional financing and the acquisition of mineral properties of merit. There can be no assurance that the company will be successful in raising the required financing or acquiring mineral properties. As at September 30, 2006, the Company had cash and cash equivalents of \$14,535 and working capital deficit of \$277,885.

The company's ability to continue operating is dependent on management's ability to secure additional financing and mineral properties. Management is actively pursuing such additional sources of financing and mineral properties, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Because of this uncertainty, there is substantial doubt about the ability of the company to continue as a going concern.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the assumption that the company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation.

2- Significant accounting policies

The accompanying unaudited financial statements have been prepared in accordance with Canadian generally accepted accounting principles on a basis consistent with those outlined in the company's audited financial statements for the year ended December 31, 2005. These notes do not include all of the information and disclosures required by Canadian generally accepted accounting principles for audited financial statements. These interim financial statements should be read in conjunction with the most recent annual financial statements of the company.

3- Capital stock

Authorized: Unlimited common shares without par value, of which 36,389,366 common shares were issued as at September 30, 2006 (December 31, 2005: 36,364,366).

Stock options

As at September 30, 2006, common shares under option are as follows:

Number of shares outstanding	Number of shares exercisable	Exercise price (\$)	Expiry date
1,365,000	1,365,000	0.15	January 3, 2008
100,000	100,000	0.15	August 21, 2008
<u>2,458,000</u>	<u>2,458,000</u>	0.10	September 17, 2009
3,923,000	3,923,000		

Stock option information

The company applies the fair value method of accounting for stock options and, accordingly, the fair value of stock options of \$22,263 has been included in administrative expenses. The fair value of options granted was estimated at the date of grant based on the Black-Scholes option-pricing model, using the following assumptions:

Expected dividend yield	2004 Nil	2003 Nil
